## 7 Handling and Storage

### · **Handling**

#### · **Precautions for safe handling:**

- Ensure good ventilation/exhaustion at the workplace.
- Open and handle receptacle with care.
- Be aware of any signs of dizziness or fatigue; exposures to fatal concentrations of this gas mixture could occur without any significant warning symptoms due to the potential for oxygen deficiency (simple asphyxiation). Do not attempt to adjust, repair or in any other way modify the cylinders containing this gas mixture. If there is a malfunction or another type of operational problem, contact nearest distributor immediately.

#### · **Information about protection against explosions and fires:**

- Do not spray on a naked flame or any incandescent material.
- Keep ignition sources away - Do not smoke.

#### · **Conditions for safe storage, including any incompatibilities** Store away from strong oxidizing agents.

### · **Storage**

#### · **Requirements to be met by storerooms and receptacles:**

- Store in a cool location.
- Cylinders should be firmly secured to prevent falling or being knocked over. Cylinders must be protected from the environment, and preferably kept at room temperature. Cylinders should be stored in dry, well-ventilated areas, away from sources of heat, ignition, and direct sunlight. Protect cylinders against physical damage. Full and empty cylinders should be segregated. Use a "first-on, first-out" inventory system to prevent full containers from being stored for long periods of time.

#### · **Information about storage in one common storage facility:** Not required.

#### · **Further information about storage conditions:**

- Keep receptacle tightly sealed.
- Do not gas tight seal receptacle.
- Store in cool, dry conditions in well sealed receptacles.
- Protect from heat and direct sunlight.

#### · **Specific end use(s):** No further relevant information available.
